Once you have chosen a template, you can continue to make more complex drawings and models. AutoCAD operates using a two-axis mouse; the left button is the primary control and the right button is used to select objects in the drawing. It has two levels of detail—contour and line. You can use the modifier keys to access the contextual menu. The drawing area is divided into three regions, and they can be accessed by clicking on the tabs at the top of the screen. Each region is useful in different ways and has its own tool palettes, such as shape tools and types of dimension tools. AutoCAD is designed for rapid creation of complex drawings and models. From the Home tab, you can open multiple drawings at once and also use a “Pick” tool to quickly place objects on the drawing.
