While playing with some QGIS tutorial files, I noticed a vast number of different layouts available for field calculator. While most standard layouts look like this , there are even and others . Why are there so many? A: One reason why it is so hard to find the perfect layout is that it is a complex topic. That's the reason why there are so many different layouts available. Also, QGIS could be updated and a new layout is added when it is implemented. This means that the question is
