Photoshop has the ability to save projects in Creative Cloud (CC) format. Creative Cloud is a subscription service where you can store a shared network of projects, in addition to a cloud backup. Adobe also offers Photoshop tutorials and DVDs that come with the option to license the DVD online. The tutorials contain both step-by-step instruction and the sometimes more helpful "how-to" videos that walk you through the process of working with specific tools or creating a specific type of effect. Adobe publishes their tutorials on their website, and many tutorials are also available for purchase from other companies. Adobe hosts an extensive list of tutorials (called "expert" tutorials) that are priced at \$9.99 each. You can view these tutorials by purchasing a subscription to Creative Cloud. Most tutorials only require a single pass through Photoshop and are straightforward enough to even begin by trying them with free trial versions of the software. **Figure 1-9:** The left side of the tutorial contains a list of examples. The image on the right is the result of using the "Instructions" option at the bottom of the screen. Another option is to use the tutorials found on the Adobe website. Often, though not always, a free or inexpensive tutorial will

There are many useful Photoshop alternatives to the popular graphics editor, but maybe you're interested in one that's easier to use than Photoshop, performs better on a budget, or just doesn't require a license. Here are the best alternatives to Photoshop. Mac Adobe Photoshop Express is a free, web-based app for creating, editing, sharing, and storing photos. It's also the only app with all the power of Photoshop. Plus, you get a 30-day free trial, so it's more than worth trying before you buy. Photoshop Express is light on features but the core photo-editing and sharing features work well on a web browser. It doesn't have features like layers and masks that you need to make art. You can download files from the web and you can share your creations with your friends. You can tag and search your photos as well. With the paid membership, you get cloud backup (which is free with the web app), unlimited downloads, and a host of other features. For real-time editing, editing light and color, and the deeper features like layers, you need Photoshop or an alternative. Pixlr is the web app you'll love. If you're an amateur looking to edit images, then it's the app you should try. The web app lets you edit and customize images with the basic tools like color picker, rotate, blur, sharpen, and more. There are less features than Photoshop Elements, but you won't feel limited by a lack of features. The interface is straightforward, and you can import your images and create new ones, which is more than enough for a free app. Adobe has announced that they are ending support for Windows XP, so if you're still using it, consider updating. You'll find support for XP on Windows 10 and Windows 8 or higher. Go full Photoshop and get the full version, but if you're just looking for a web app to edit a few images, then Pixlr is a good start. Adobe Lightroom is the front-end to the cloud-based Photo Management solution, but it's not the only app for this. You can use Lightroom to edit photos on your Mac or PC or use Lightroom mobile to edit photos on your phone a681f4349e

the world's largest economies. The US and China started easing up on the trade war front by signing a ceasefire agreement on February 15. However, just a day after the agreement, President Trump warned that he is not "yet" done with the trade war. "Tariffs will begin on Oct. 1," Trump tweeted. After experiencing a steep decline in the business activities and sales of the healthcare products, China's healthcare product exports to the US declined by 16 per cent last year. This information was stated by Patrick Murphy, director of the Office of US Trade and Development Mission to China, in a report published by the American Chamber of Commerce in China on July 9. "In 2018, the report reveals that Chinese exporters of healthcare products in the US experienced a 16 per cent decline in both domestic and cross-border sales as a result of the US-China trade war, even as this sector accounted for 23 per cent of US imports from China," he said. The healthcare sector is also faced with an overcapacity of over 400 medical devices, according to a study by the Chinese Academy of Social Sciences. The National Healthcare Security Bill, which is pending before the US Senate, is expected to be passed soon. The bill will allow the Trump administration to limit the imports of drugs and medical devices from abroad. The new law is expected to be enacted soon as the current law on pharmaceuticals expires on May 7, 2020. The report is based on data released in the last two years. On June 18, China approved the medical device industry's regulation of exports. Under the new law, the Chinese government will take over management of the quota system set by Beijing in 2015. Still, the US-China trade war should not necessarily be the reason for the decline in the healthcare exports to the US. Besides, overcapacity of medical devices is unlikely to impact the foreign trade of the US. "Medical devices are often innovated and produced in emerging economies, so even with China's potential mitigation of the overcapacity problem, the US and other developed countries still have an advantage in the global medical device market," said Robert Park, a business professor at the City University of Hong Kong. Blog It's been a busy few days and I've not been keeping up with the blog so my apologies for the lack of posting. The good news is that we are now in the last stage of building our kit.
