

If you are a software coordinator or contract manager, an Autodesk Account provides serial numbers and product keys for all products on your .NET server. To obtain Autodesk Standard or Autodesk Asset Management batch data serial numbers and Microsoft Embedded Standard keys from your Application Licensing Center, or LA, you must refer to the product download instructions, Download Guidelines Licensing Terms The entered serial number and license key correspond to the license terms set by Autodesk. For each computer that you download for use in the United States, Microsoft must provide your product license number. Information about serial numbers can be found in the Download Instructions. To obtain a serial number and license key, you will need: - Product Activation Certificate (GUID) - Product serial number (DTNV) An activation cartridge is required to use the license in the BPASS version of BPVM.If BPAD (Business Performance Data Services - Business Performed Data, "Business Natural Synthetic Data") is not installed on the computer or Autodesk server, then the activation cartridge will not be enough. When installing on a computer with BPAd BPATC, you must install this package and install BPUSK. When you download the BPPS version of BPWin, you must install and specify the serial number required to install the program on this version of the machine (see Instructions for downloading the BWins version for using older versions of BP). Deviating from the serial number is required when loading the BPKey.pas file, which contains the serial numbers of all other Autodesk BPM components. Deviation from serial numbers is necessary in other cases as well. Learn more at Boot Outputs for Autodesk BPM Help Integrity Control Arguments for BPMS Serial numbers are defined at the physical media level. If you do not have a physical media with a product serial number installed, you need to find it on your computer and remove it. This procedure is shown in the figure. If you have physical media with serial numbers, you must insert them into your drive to remove them
