## What's New in the?

The screensaver shows beautiful pictures of various kind of dolphins. Dolphin pictures are presented in a pleasing manner that makes them a delight to the eye. The pictures are animated with different background and with realistic music. The movie starts immediately the screensaver is opened and lasts for several minutes. This screensaver shows that dolphins play very important role in the environment and in the development of the human civilization. Dolphins are a part of the planet's ecosystem and their existence is important for the continuation of life on Earth. Excerpt from Wikipedia: The term "dolphin" may refer to one of the species in the family Delphinidae, of which there are eight. The marine mammals are large to very large mammals. They are cetaceans, which means they have a toothed whale, and are thus not true porpoises. There are several different subfamilies in the family, including the Delphininae, Iniinae, Lipotidae, and Physterinae. In addition to their ability to communicate with each other, dolphins show a number of other intelligence-like traits. They have the ability to learn and remember skills and tactics, both in terms of individual skills and of working together with other dolphins. Although dolphins are "social", their social behavior is not always of the same kind. Some social organizations appear to be ruled by a matriarch, while others are more matrilineal. There are examples of cooperatively breeding animals, some organized into matrilineal societies, and others organized into matrilineal societies. There are also instances of unisexuality. Because they are cetaceans, dolphins must have a good understanding of the Earth's surface, including the sea floor. I-670 I-670 or Interstate 670 is a major United States highway that follows much of the south-north border of Ohio from Sandusky to Indianapolis. It begins at the Ohio-Indiana border and travels north into the state's capital city, Columbus, where it ends in the Cincinnati suburb of Madeira. The highway is in length and forms the eastern boundary of the city of Columbus from the Ohio-Indiana border to Ohio State Route 678. It originally designated the path of the Erie Railroad line between Columbus and Toledo, which was sold to private companies. The highway was originally designated the "Road from Cincinnati to Sandusky" by the 1931 Ohio State Highway Commission. It was designated part of Interstate Highway 70 between Columbus and Indianapolis in 1956 and has been maintained that way since. The highway's present designation was established in 1981. Route description I-670 begins at the Ohio-Indiana state line south of the village of Crossroads, south of Batavia, Illinois, and south of the village of Solon, Ohio. The highway passes under I-80/I-90 and overlaps with I-
