No problems during my test run. I think it would work great with no problems on an ipad. 5. Kopi pro. classic, 09/17/2013 Easy To Use and Easy to Install I would give this app 9.5 out of 10 stars for its ease of use and installation. The developers really did a great job. It is very simple and easy to use. 4. KoPRO 2.3 - Download, 03/21/2013 Good app but one mistake with the files This app worked perfectly but the developer made a mistake with the files. The app worked but only for some users. This is a problem with some players (Dia, KOPi Pro Classical and iKOPi Pro). They just can't play on this version. It has nothing to do with the app but only with those files. I would suggest the developer to check the files or maybe to test with new players. I guess this was an error in his mind. This is a great app. I will rate it at least 9.5 and I am very sure this will be at least a 9.5 app. 5. KoPRO 2.3 - Download, 03/21/2013 Good app but one mistake with the files.
