Knowing how and where to click will save you a lot of time. So what do you need to know before you start using AutoCAD? Here are some essential things to know about using AutoCAD for the first time: Autodesk's AutoCAD tutorials on the Internet also go over some basic commands and functions that are very handy when using AutoCAD. Every AutoCAD expert agrees that the keyboard and mouse are the keys to use while using AutoCAD. It makes more sense to learn AutoCAD on a computer that has a keyboard and mouse. AutoCAD commands must be typed using the arrow keys on a keyboard and cannot be done using the mouse. So do not expect to navigate around the drawing by moving the cursor. Mouse buttons may be used to select objects. Sometimes you will want to right-click (Control-click) to open the context menu and right-click on an object to select it. Learn the names of the different tabs and buttons on the ribbon. It's important to be able to find the right tab or button for the task you are trying to accomplish. You may want to purchase a drawing book, like the Autodesk Official Drawing Manual, to learn to use the entire AutoCAD software. AutoCAD has a lot of helpful tools to find help and information. And a drawing book will give you access to more in-depth information. AutoCAD will produce a variety of different file types, depending on the tools you use in the software. And file formats may change, so check out the list of the different file formats available at the Autodesk website. A Few Things to
