## TypeTool [Win/Mac]

----- TypeTool is an application created to be a simple and easy to use font editor for Windows. For students, hobby typographers and creative professionals who occasionally need to create or customize fonts. TypeTool is a simple tool to insert symbols or characters (also known as "fonts") into an e-mail message, creating a customised e-mail. This tool can be used to send letterheads, logos or products (with company or school letterhead) with fancy styles. Features include: - Inserting Fonts: you can insert any font into a document with just a few clicks. - Create shapes: create a new shape for your logo, school letterhead or any other design. - Show "character preview": change the font style in real time. - Insert special characters: improve your typography with the package of characters that you can use for creating different designs. - Simultaneously insert several documents: with a few clicks you can insert 2 different documents as a multi-page document - Format text and shapes: Just select some text or a shape and TypeTool will apply the formatting to them automatically. - Edit text and shapes: If you want, you can change the size, colour, typeface or style of text or shape. - Spellcheck: TypeTool will warn you if there is a spelling error. - Button and link: If you want to insert a button or a link you can choose from a list of predefined style or add your own picture instead. - Import images: if you have some graphic files (.png,.gif,.jpg,.tiff,.bmp and.svg) you can use them to insert into a document. - Import and export: You can copy and save all the documents you create as.TXT,.HTML or.HTML "HTML Attachments".

FontLab is a font design software with a simple and very fast approach to creating and editing fonts. It's a tool for easy designing of fonts as it lets you extract hundreds of "letterforms" (sources of the font, such as type-face, style, language, style,...) easily, and the most common one: capital letters, lowercase letters and numbers. It lets you combine these different sources of fonts easily. The Foot Print of The Soul is a new project of the BBC World Service. It will combine music, spoken word, text and animation to explore each sense in
