The AutoCAD features are complex and widely varied, encompassing 2D drafting, 3D modeling, detailed technical drawing, 2D and 3D drafting, image-editing, 2D and 3D printing, web publishing, and many other applications. AutoCAD's 2D features include drawing, editing, and annotating objects, adding text, symbols, and dimensions, and importing and exporting data in various file formats. It also contains extensive parametric modeling, whereby dimensions and other data are automatically updated when the model is modified. AutoCAD features a comprehensive set of tools for drafting and annotating 3D objects, with a special focus on maintaining polygonal topology. It also includes a wide array of specialized features, such as the ability to animate objects and to perform numerical analysis. AutoCAD is a software application that supports the design, creation, and maintenance of drawings, and is used by architects, mechanical engineers, carpenters, illustrators, designers, graphic artists, lawyers, mechanical engineers, electrical engineers, civil engineers, engineers, builders, architects, and many others. AutoCAD Modeling Basics The primary focus of AutoCAD is the modeling of three-dimensional objects. These objects may be constructed from collections of planar polygons. There is a concept of "nonplanar" geometry, but it is seldom used in practice. An object is modeled in such a way that it can be displayed in perspective in two dimensions, and can be rotated around a center point to give the three-dimensional perspective. The drawing area consists of a rectangular two-dimensional (2D) area on which the 3D model is built. This 2D area is referred to as a Drafting Area, or, more commonly, a Drawing Area. It is visible to the user, who can modify it by drawing shapes, text, and annotation. The Drafting Area is often referred to as the canvas or workspace. A bounding box is a two-dimensional (2D) box that contains all the 2D elements in the model. (The box may not fully contain the 3D elements.) The 3D elements cannot be viewed or manipulated in the Drafting Area unless they are inside a bounding box. The bounding box is called the work area. (There is no work area in the perspective mode.) Every AutoCAD object has a definition, referred to as a Drafting Object. (Drafting Objects do not always

As soon as the New England Patriots and the Houston Texans reached an agreement on a trade that sent Arian Foster to the Texans, it seemed to many to be a bit of a reach. Sure, the Texans needed to make room for Foster to put a player on the 53-man roster, but why would they trade a player that was even close to being the team's leading rusher? But on Monday, we got an answer to that question. If reports are to be believed, the Patriots are willing to part with a draft pick to land running back Alfred Blue. According to NESN's Mike Reiss, the Patriots are willing to give up their fourth-round pick in exchange for Blue, the 247Sports' No. 14-ranked running back. Mike Reiss reports New England will give up its 4th rounder for RB Alfred Blue. Pats are ranked #8 in running back by ESPN — Mike Reiss (@NEESPN) August 24, 2014 Reiss reported earlier this month that the Texans had interest in trading for the fifth-year running back. He said at that time that the Patriots were not willing to part with a draft pick to acquire Blue, but an earlier report indicated that the Patriots had inquired about his availability. With the trade of Foster, and the signing of Knowshon Moreno to a one-year deal, the Patriots have downgraded their depth at running back from what it had been earlier this year. Blue has been impressive during his four years in college. He ran for 1,507 yards and 20 touchdowns during his final year at Oklahoma. He also caught 29 passes for 508 yards and two touchdowns. He averaged 4.8 yards per carry in his final season. His speed and ability to take it the distance would seem to make him a perfect fit in the Patriots' offense. As we mentioned earlier, he'd be a nice addition to the team's depth at running back. We'll have to wait and see if the Patriots will make this trade, but it would make a lot of sense for them to do so.
