The FIFA franchise has emerged as the world's leading sports gaming brand. Created by EA Canada, it is the most popular sport simulation series globally. FIFA for Windows Live Game is FIFA for Xbox 360, one of the most popular games for Xbox 360 users. The game is a simple, intuitive, strategic, fast-paced action game which is easy to play, but difficult to master. This game is the most realistic sports simulation video game in the world, in which players control players from the world's best clubs. The latest addition in this series of well-known football games is FIFA for PC (Windows), based on the popular FIFA for Xbox 360. How does FIFA work? FIFA is a fast-paced action game which simulates the movement of soccer players. As players, you must choose an attacking team, create teams and tactics for that team, and choose tactics and form a defensive line to withstand the flow of the game. Quick Tips: Thinking ahead Stay on your toes! Before deciding on a move, consider your options: if you don't have a free man, you can pick a pass. In possession, if the pass to a supporting player isn't open, play it yourself and find the space. If the support isn't working, play to a free man. Dressing your team Keep an eye on the formation bar - you'll want to set up your formation in advance. A successful attack will usually take two formations and the formation has some important roles. The defender, goalkeeper and strikers are in the box and around the box. The deep defender, central defender, midfielders, wingers and strikers are out of the box. Set up your formation before the match. It's okay to change your formation during the game, if you think of a better chance and have enough time. The attack With so many options in attack, it's important to use caution. We are about to spend a lot of the ball, so don't waste a good chance by taking a risk. What's the problem with taking a risk? For every good pass, you have to make sure you don't give away a counter attack. Having a goalkeeper means more patience, because passing to another team player is more difficult. Be patient with your bc9d6d6daa
