Who else is using IG:dm? As of right now, I do believe it is only available to a handful of people. Is there a way to uninstall it? Sadly, there is no uninstall guide. This means that you might be stuck with it no matter what you decide to do. My experience: I got myself this feature because I had to use it through my friends on Instagram. Sometimes when I was on the mobile app, they would use it and send me messages back so that we could chat online. I did not like this at all. There was no fun in it. They would say hello, "What's up?", and I would reply with some cute comment. Why use IG:dm then? The only reason I used it was because it was the only alternative in order to contact my friends online. Update: It is currently unavailable. If you want to contact Instagram, you can write them at support@instagram.com. If you are a big fan of the platform, you can also vote for Dm to be reinstated. It is important to note that in order to vote, you will need to create an account on Facebook. This is because you are going to need to have at least one friend on Facebook in order to use it. Remember that it is a Facebook app, so if you are logged into Facebook, you can log in and use the app. Disclaimer I'm not the developer of it, nor do I have any connection with it. The information in this guide comes from the site itself. Instagram:dM Who else uses it? The use of this is quite popular, but you might have to know someone's Instagram ID in order to be able to communicate with them.
