A beautiful nightmare on the haunted side of the Atlantic. Explore underwater corridors while being hunted by one of the resident sea monsters. Recharge your fuel supply every 15 seconds to keep ahead of your pursuers. 20 hunting levels and a huge open world. Trigger scary sounds in the distance to keep your pursuers on your tail. Immerse yourself in a deep fantasy-horror world. Since the arrival of the human race, humanity has carved an ever expanding society along the coasts of this planet's oceans. Outside, the harsh lands remain unknown and unexplored. Inside, the oceans hide an ever growing number of secrets waiting to be discovered... The surface of the ocean's outer layers, the so called "Seas", has always been something strange and enigmatic. For the longest time, the deepest depths remained largely uncharted, but since then, the history of mankind's presence there has become a little more known... But what else than the horrific "Frogfish" or the "Yelp", the sea monsters so common among the oceans of this planet, has been missing from the oceans' depths? The truth is just as ugly as it is terrifying... Play the latest horror-horror-horror shooter for HTC Vive and Oculus Rift! INTRODUCTION Explore the deepest depths of the ocean, now haunted by so many evil beings... FREQUENTLY ASKED QUESTIONS Q: What is this game about? - Interesting game, but my character is completely locked. - Game structure is good, but the idea of the game - unfortunately bad. Game "fantasy air" Gameplay: - Gameplay is smooth, and only a few glitches. - To acquire a character, you have to train him. The only problem is that you need to spend materials to get a character you need, which has to be spent in the game. - The gameplay is quite interesting, and the graphics are pretty. - Gameplay - very good, only the story was bad. I'm trying to declare a json function to retrieve a float64, so I can use the JSON Decode function to retrieve the float64 in a map of custom structs. The problem is that the variable "s" is always 0 after the Decode function is run. How do I fix this? package main import ("fmt" "encoding/json" "errors") type Custom struct { Value float64 } func main() { var s Custom json.Unmarshal([]byte(`{"Value":0.8}`), &s) fmt.Printf
