Sebootloaderunlockingrelockingexe - Free Download Karaoke Song Repo - Hello world! (2048) Ukori Vs Lire 10 - sfd - Q: Route parameters order in Yii2 using gii I am using Gii to generate my controller and models. I need to add a route to my controller. Example. My route in my yii.php should look like this `$config = yii\web\ArrayConfig::merge(['enableCsrfValidation' => true, 'enableClientValidation' => true,]); $router = Yii::createObject(ArrayHelper::merge(['id' => 'home', 'label' => 'Home',], $config)); $router->class = 'HomeController'; $router->defaultAction = 'index';` I use it like that in my ApplicationController when i call it from my HomeController public function actions() { return ['home' => ['class' => 'HomeController',],]; } but i need to know if i have a parameter in my route, i mean i don't wanna have to have a parameter in my route always. example: return ['home' => {
