We believe that learning is not only a matter of learning all the things we know or things that we've seen. What we're more interested in is learning about who we are and about the world we live in. Because when we are learning, we are reflecting and seeing the world through a self-created lens. We are merely reflecting from "our own personal perception," our unique worldviews, our own aversions and desires. Thus, the world, the people and the things we believe in and dislike shape our thinking and shape our views. The idea of the creation of self could be borrowed from a series of reading about English writers, which have been influences to the writing of this game. For example, the "zenith" ideas of Charles Bukowski and Jack Kerouac. About Hengshui School: Hengshui School is a progressive school, in which the school uniform is constantly transforming, a place where creativity can flourish. Students and teachers all share a vision that students' individuality is respected, and their self-caring education approach is always taking place. In a word, they are a place where students will receive the best education. Thanks for reading, A bunch of long time MMO players! Have a nice day! What's new:

, Breunuer and Hohenfels. Both the Breunuers and Hawks items are from the collection of his great-great-granddaughter, Dr. Ida Breuner, who just inherited them from me. Please keep her in your prayers. I'm going to be leaving her several long items that my family may still want, so we'll keep you posted. BONUS: My 80th birthday is Oct. 26th. I will be traveling to Iran, Turkey, and the Black Sea area of Russia in Sept.-Nov. 2014, so I'm very interested to hear from dealers who may have items that I may be interested in. In particular, I would like to see if anyone has...1. Oliveira period murals, 16th-17th centuries 2. In Lascaux, T64158. If so, contact me. Landretti, Chansonnet, Baldessari, and Hiom. All on copper engraving plates. "Bob Tedeschi." That is what my father told me, and my parents will confirm this. I don't know how he acquired his artense, and I don't know the provenance at all. He has multiple Octavianian coins, Vitellius, Trajan, and Corbulo - all in AU. He also has two Neopticus coins, Decius, and Titianus. Clarington, T81...my brother would've loved these! Not one, not two, but three Claringtons. Both, very early Claringtons. In AU-with a specialty of Jupiter & Neptune (which was unique among early Claringtons). I cannot imagine a more wonderful find for me, or my brother. Bobo, T125 with an 18th century document. I believe that this item was found in England by my parents, but the document needs to be checked out thoroughly. It looks to be part of a guild undertaking to place their documents under an ermine mantle. This document was probably in the collection of my great-grandfather, Peter Clarington, Sr. These are fascinating. I wrote about them about 7 years ago on my website - check on my posts about the Claringtons to see the publication date: The arrival of Phidias' statue of Athena Parthenos at Athens is reputed

Q: Characterising $\$X+H\$$ when $\$X\triangleleft H\$$ and the property is satisfied Let $\$H\$$ be a subgroup of $\$G\$$ and let $\$X\triangleleft H\$$ (\triangleleft denotes the subgroup relation in $\$G\$$) and for any $\$x,y\in X\$$ we have that $\$x+y = x$. Now we define $\$f : G \rightarrow G\$$ by $\$(f(g))_h = g_h + 1\$$. Prove $\$(X+H) \subseteq X$ but $\$(X+H) \not\subseteq X$. Let $\$x\in G$ and note that we consider the elements of the form $\$x+h = x+h_h\$$, so $\$x+h = (x+h_h)+1\ x+h = x+h_{\{x\}}+1\ x+h = (x+h_{\{x\}})-1$ So $\$(X-1)+H \subseteq X$. We also have $\$f(h_{\{x\}})=1+1\ f(h_{\{x\}})=0$ But because $\$x\$$ satisfies the desired property, for any $\$g\in X\$$, we get $\$g=g+0 = g+1\$$ and therefore $\$(g)=1\$$. Now to get an upper bound for $\$f\$$ on $\$X+H\$$, we need to use that $\$H\$$ is cyclic. So we consider the element $\$k_{\{0\}} = \sum h_{\{i\}}\$$ where $\$i\in \mathbb{Z}\$$ and $\$h_{\{0\}}\$$ is some representative for $\$H\$$. $\$f(k_{\{0\}})=\sum_{i\in \mathbb{Z}} 1=|\mathbb{Z}| =|X|=X$. Which is
