Tactical Chronicle is an epic pixel RPG with a tactical combat system and heavy customization options. In this highly-requested remake of the legendary game, players will lead a band of heroes into a massive campaign full of secrets, quests, and battles! Players will build a party of up to three unique characters from eighteen different character classes, each with their own unique skills and equipment. Form the party's strengths to your liking, and grow each of them through lessons and experience gained during battles. Face thousands of threats in an extensive, handcrafted, open-world RPG world. Search through towns and cities, get into battles, earn treasure and gain new weapons, magic and armor. Add traps, or take a "dungeon crawl" route? Build your castle and decide what you want to defend. When enemies attack, watch in real-time as you can optimize your party and build your strategy before the battle, and watch the results in a strategic battle preview screen! What's Next: Stuff we're working on next include: - More character classes - More parties and loot - More enemies and traps - More quests and cities - Arcade game - 5 characters, 8 maps - 100+ enemies - Terrain, tech, and more - More balanced battles - Implemented heart-rate features - Hero menu with special talents - Party menu More detailed features will be addressed in further updates. Tactical Chronicle takes the classic turn-based tactics series, Fantasy Wars, and brings it to modern day. The classic battle system has been updated to feature fully customizable characters, with hundreds of points and stats to build any kind of battle you want. Prove your tactical skills in game after game, as you progress through the twelve chapters. Along the way, you'll face high-level bosses and bigger battles than ever before. Every victory you earn will help you build your party. Make sure your heroes are equal parts offense, defense, armor

What's new:

For Xbox 360 I just received my boxed Xbox 360 which includes a standard Xbox One Remote and a trigger finger to play Xbox 360 games. Here are some general tips to help you with your new trigger finger: • Use your left hand to activate the left thumbstick, while leaving your right hand on the Xbox 360 controller. This will prevent the trigger finger from going into spasm. • Do not play FPS games on the Xbox 360 controller with your trigger finger! They are simply too twitchy for gaming. • When playing backwards motion games like Skyrim, go right to the edge of your gamepad, and hold, then slowly pull the controller back. • Use the Xbox 360 controller in the latest generation if possible. If your console is old, and has a digital or arcade style remote, then use that. Most arcade controllers have a trigger that is very loose and will not cause your trigger finger to spasm. • The analog + and - buttons have much less tension than the Xbox 360 controller and will not affect your trigger finger. • Avoid using your trigger finger to pull on other objects, and avoid wearing pants that have tight elastic. 6 thoughts on "Trigger Finger For Xbox 360" I've been trying to set up a tv that I can stream my xbox on, but it will not let me. I have already installed the xbox live application on the new xbox already. But on the tv it doesn't work. And soo many people can only watch on their tv, or computers....Can someone help me please? I was trying to find my disk for my Xbox One with my foot so that I can play on my Xbox One on my TV (I recently gave away my old one) but I was unable to find anything that I can believe that a disk would not be in it, and I had no idea what to do. We have a 75 inch Sony Bravia TV with 4 HDMI ports. I bought the HDMI set from Micro Center in Madison, WI. I put the HDMI-DVI/VGA converter box in the TV and configured with the XBOX 360 cable and my controller. I connected all 4 of my XBOX 360 cables to it (HDMI, HDMI 2.0, TXS, and RP) in turn, and ran all of the cables to the TV, and finally connected all 4 HDMI sockets to the TV. It works with the first XBOX 360 compatible cable
