Trundle is a third-person platformer in the style of traditional '90s games. The goal is to guide the ball across the landscape, hitting green platforms to climb walls and roll through tight spaces. Each level can be replayed in Hardmode, an upgraded version of the game where each platform reacts as you hit it, and is comprised of 15 varying levels. Trundle Crack [Win/Mac]

FEATURES: - Crossplatform- Fullscreen play - 12 Levels of increasing difficulty: Easy, Normal, Hard, Master - Stunning visuals for a 3-D platformer - Customizable Ball - 20 Music Tracks - An hilarious and oddball story about an interdimensional jumping ball Platformers are one of the most popular genres of videogames, mostly because of the inherent difficulty in mastering control mechanics. Rotation, teleportation, jumping, ground and air-based combat, power-ups... There are as many ways to control a platformer as there are levels. Due to this, platformers are typically not as popular as other genres of videogames. However, if you master the controls of a platformer, you can spend as much time as you want customizing your character in the same way you customize characters of other genres. A bunch of us at G5 Games have been thinking about putting together a puzzle platformer that uses minimal characters and controls, so we started working on a prototype named Trundle. Our main goal was to create a game that focused on gameplay over story, and to have a character that represents the player in all aspects of the game. We started toying around with the idea of using a ball as a platformer character, and at that point we decided to use a similar yet unique control scheme of Star Fox. Instead of grabbing and tapping a joystick, we made our character jump by pressing up and rolling on the ground. We then spent the next few months making Trundle. The production time was split in three roughly month blocks. The first block, from March to June, we spent mostly on designing the levels, most of them taking place in space, and making the main character. The second block, from July to August, we spent our time in the jam, making the game, and at that point we were really excited about the production of our game. The last block, from September to December, we spent mostly on finalizing the game. For the first time in G5 Games history, we had two "jam" days. On Saturday, October 5, and Sunday, October 6, we had a day filled with production of Trundle. One person had to playtest, one person had to design a level, one person had to design a new character, and the rest of us worked on prototyping, programming, art, and sound. We had planned to produce the entire game in three blocks,

Great first podcast. Fantastic. Good work as usual! Keep up the great work, guys, and tell everybody in Knoxville that I'm a huge Jimmy McGehee fan. Just kidding. But given the choices of characters and personalities, Jimmy McGehee sort of does stand out as being the guy least deserving of a bookend episode. In any case. Great episode. As usual. Pony Troyer will be heading out of town for the remainder of the month, then come back to post the next installment in early July. Meanwhile, Ty the DJ has been up to a few things. For the past week or so, he's been involved in setting up Word '90's Web Master, an online writing program that's pretty slick. At least Ty thought
