So.. It's like Peggle, but with Words! ? You need to "Scan" letters and correctly shoot them to the center of the cross-hair, while avoiding the other letters that fall from the sky and trying to get combos by shooting the right direction together. You have to use more than the "Scan" button in order to get combos. There are 3 difficulty levels (Easy, Normal, Hard), you can switch between them with the "Play" button. The letters will fall from the sky in random directions, so it's pretty hard sometimes to aim properly, and the line you need to shoot is a bit off-screen. It's like being a fish in a barrel sometimes, but it's totally worth the trouble. It has an quite nice soundtrack. The only thing that I noticed is that you don't get feedback about your "Scan" accuracy and which direction you are aiming at. I'm pretty sure you can feel the difference when you shoot correctly or miss by a tiny bit, but it would have been nice to get some kind of feedback about that. But I don't mind. It's probably too much for simple guys like me to spend so much time after 10-12 hours of working! ? Gameplay: 4/5 PEGGO! has that addictive quality you want in this kind of game. You don't want to stop playing it, and it keeps you going even when you get sick of it. It was even on my top apps for the first week I bought my iPad. Technically it's pretty good too. You can play it in landscape mode, you have a few options for the backgrounds, you can choose between the black, grey, white and rainbow backgrounds. And each letter is a bit larger than in Peggle, which makes it easier to grab it with your finger. The "Play" button is there, but it's pretty hard to hit it with your finger. And the controls are easy to understand too. The letters will fall in random directions, your score is determined by the number of points you have when you're done, if you don't get 10 points you'll lose a life. There are 3 different aims for each letter that you can shoot, which one will you choose? You
