**\*\*Adobe Photoshop Elements:\*\*** The Adobe Photoshop Elements suite is an inexpensive alternative to Photoshop. Elements includes several basic editing and retouching tools. It doesn't include many of Photoshop's advanced features, such as the Liquify filters and the Healing Brush. You can download a free trial at ``www.adobe.com``. You should check with your distributor for the latest updates on when you can update your copy. Photoshop Elements is also available as a stand-alone program for those who don't want the full version of Photoshop.

**\*\*Apple iPhoto:\*\*** This image editor is part of the iLife application. (The four iLife applications that Apple includes in the iLife suite are iPhoto, iMovie, GarageBand, and iWeb.) iPhoto is a pretty good substitute for Photoshop if you want only to crop, rotate, resize, and do basic retouching on images. It isn't as powerful or versatile as Photoshop, so it's not appropriate for creating graphics or web graphics, for example. You can download a free trial of iPhoto at ``www.apple.com``.

**\*\*Macintosh programs:\*\*** Mac users have access to a variety of image-editing programs, including the following: \*

The free Adobe Photoshop Elements is available at [www.adobe.com](http://www.adobe.com). \* The \$100 PhotoMechanic from The Graphics Group can replace the expensive Photoshop Elements and has better overall tools for photo-editing. It's only available for the Mac. (See [www.thegraphicsgroup.com](http://www.thegraphicsgroup.com) for more information.) \* The \$100 PhotoMechanic II from The Graphics Group has improved tools over the previous version, and like the original, is only available for the Mac. \* The \$50 Adobe Photoshop Elements plug-in from the Webmaster Central at DreamHost enables the \$100 PhotoMechanic to be used with any image file that you import into Elements. (Check out the free tutorial at [www.photoblogtools.com/photoshop-elements-plug-in-tutorial](http://www.photoblogtools.com/photoshop-elements-plug-in-tutorial) for more information.) \* The free (or inexpensive) iPhoto application lets you do basic editing, such as resizing and cropping. \* If you have an image of your web site's logo or other graphics on the web, you can often use the free Photoshopped site logo generator from [www.photoshopped.com](#)

A photographer spotted I made a homemade apron to protect myself from the splashes when I was laboring... I took my camera and went to the lakeside where the road from the neighboring village ends. There are two lagoons there, one with a small stream running through it; the other is almost a lake. I photographed a few fruit vendors who sell a variety of fruits. I bought some mangoes and tangerines and left. On the way back to the house I kept stopping to take pictures of the small villages with the colorful houses and cobblestone streets. It was a place of contrasts; one small farm was surrounded by debris with a snake in it; another had food vendor outside his house selling fresh sweet corn; and yet another had a muddy slush road at the end of the road.

Axiom Business Solutions launches re-engineered brand Axiom Business Solutions, UK's leading supplier of small business software and services, has launched an updated version of its website, [AxiomBS.com](http://AxiomBS.com), which has been re-engineered and is now powered by a new platform. The website is enhanced with a brand new look, which is now powered by the new [AxiomBS.com](http://AxiomBS.com) and a new corporate image that puts more focus on

the software and services that AxiomBS offers, rather than the company's heritage in the hospitality sector. Martin Elliott, Managing Director, Axiom Business Solutions, explains, "The old website, which was launched in 2001, had been the main source of communication for the company over the years and we have now reinvented it by designing it in a fresh and modern way. We have also developed a new corporate logo, which is designed to stand out from the crowd and help our customers to discover the award-winning software, customer service and support services that we deliver." The business software and services company launched their new website at the start of June and is happy with the response. The company currently has over 200 business customers in the UK and Ireland, which number is growing year on year. "Our success over the last 15 years has depended not only on the great products and support services we deliver, but also the access to business-leading software that our customers have trusted to solve their own challenges for a decade," continues Martin. "With the launch of our new website we have been able to expand the brand even further, making it even easier for customers to find us. We

Q: Is it possible to override "getters" and "setters" for custom properties with a TypeScript type declaration? I am using TypeScript and I have defined an interface as below: `export interface Deck { // Do something }` Then I declare my own custom property, for which I want to have getters/setters: `export interface Deck { public CustomProperty: number | null = null; }` How can I use that property to be able to have the following: `this.deck.CustomProperty = null; // Property 'CustomProperty' is missing in type 'Deck'.` I know I can do that like this: `public CustomProperty: number | null = null;` But I would like to have a more strongly typed solution... A: Just make your CustomProperty optional: `export interface Deck { CustomProperty?: number | null; }` And you can use null if the property is not initialized: `this.deck.CustomProperty = null;` Or if you want to initialize CustomProperty automatically, you can use optional chaining as: `this.deck?.CustomProperty = null;` How to Catch it on Camera When a Raccoon Casts. What you need: a standard magnifying glass, water (if the predator is still in the area), and of course, your camera. As stated earlier, a magnifying glass will help you, but if it isn't around, don't worry. You can help catch the raccoon or other predator casting by taking turns with a neighbor. If

one of you get the shot, the other can take a picture and the first person can then add the image to their collection of images from that location. For some locations, (including ponds, springs, lakefront property, roofing or other building wraps around the landscape, and more), it will likely be necessary to sweep an area with a large stick. If that doesn't work, a shotgun or firearm is a great way to ensure you get that image you've been wanting for so long. "It's happened before." "I can get you some help." "I'm sure you can." "Now if we can just get them to listen..." "There are rules." "We're journalists." "We follow them." "And you're in fucking Britain." "So
