STORY

There is a hidden story in the game in addition to the main quest, that you can find by playing the multiplayer mission Battle for Berlin. If you've played the single player campaign you probably already know about it, but if you haven't read it yet here's a brief summary. Derek Sharp - an American medic - parachutes into the city of Berlin on the 2nd of April 1945. Derek's mission is to provide medical assistance and care to as many surviving Soviet and American soldiers as he possibly can.

Main Story Our story begins in 1943. World War 2 has just started and the Red Army is advancing on Nazi territory. An American soldier, Private George Samuel Anderson, has just joined the army. He soon finds himself in the middle of a fierce battle near the coast of Italy. Hitler has just used unconventional weapons to win over the war. Nevertheless, the Allies are progressing slowly and need reinforcements. The new arrivals need time to get acclimated to the new conditions.

THE GAME

VIMS - The original game The game has a very distinctive art style. The game's world is designed to feel like the real life: mainly the buildings look like the ones we saw in the Second World War, but the highways and bridges are modelled after our roads and bridges. The VIMS engine is extremely powerful, allowing us to create an incredibly detailed world.

VIMS - Defeat Of The Red Army In 1943 Campaign The game consists of two campaigns - the Eastern and the Western. The Eastern Campaign is about the Red Army's campaign during the war in 1943 and the Western one is about the Americans' campaign in that year. The game also includes an RPG-style story line, so you can play through all the campaigns and continue the story without a second playthrough.

FUTURE PLANS The project is open to modders. Ask our coders if you have any questions.

Exoletuncus Exoletuncus is a genus of broad-nosed weevils in the beetle

family Curculionidae. There are at least two described species in Exoletuncus. Species These two species belong to the genus Exoletuncus: Exoletuncus bicollis Patterson, 1932 c g Exoletuncus difficilis (Patterson, 1931) i c g b (pocketbelt weevil) Data sources
