Hide unwanted files and folders using Data Shredder 4.72 Hide files and folders on your computer without deleting them with Data Shredder. Click on the image to see the manual. Download Data Shredder Pro Data Shredder is a Windows utility that allows you to permanently hide files and folders on your computer without deleting them. To do this, the program lets you select which files and folders you want to hide. Once you have done that, these items are not displayed in the Windows explorer or on the Windows desktop. This feature is useful for hiding files such as videos, games, and documents that you do not want others to see. Furthermore, the application gives you complete control over the content of the hidden items. As you can set the properties of each item (including its size and name), you can also decide if you want these items to be restored in the event that you accidentally delete them. Data Shredder is a simple and highly portable utility that won't leave any traces on your computer. It is also very easy to use. For example, if you simply want to hide a folder, a click of a button will do the job. It is not as simple to restore the contents of the hidden items. To do this, you need to boot the machine you wish to recover, and you will need to use Data Shredder's documentation to locate the files and folders you want to restore. Text Shredder Free Download is a simple and straightforward encryption utility that can encrypt plain text using the AES algorithm. The text can be protected with a single password that will have to be provided whenever you want to decrypt the text. Text Shredder Crack For Windows has many advantages over traditional tools. For example, it is portable. This means that you can encrypt the text on the fly, and it can easily be shared with others. This also means that the text can be stored on a USB flash drive, which is one of the most convenient means of transporting data. Text Shredder can also be operated from the Windows command-line interface. As mentioned, Text Shredder is also very simple to use. To encrypt the text, you just need to provide one or two passwords, and the encrypted text is then encrypted using the AES algorithm. To decrypt the text, the password will have to be provided when you need to read it. Once this is done, you can simply copy the text to the clipboard or save it to a text file
