I'd like to get the last element of a group of objects, and I'm having trouble doing it. Here's the matlab code that gets the last element of a group of objects: [group, last] = max(groups(:)); A: Assuming you mean the last element of an array, you can use: var arr = [1, 2, 3, 4, 5, 6, 7]; var index = arr.length - 1; You can also do it with an iterator: var arr = [1, 2, 3, 4, 5, 6, 7]; var last = arr.last(); he was on the brink of a new career, of a new relationship, of finding a new purpose for himself. And in the second book, The Awakening, Nathan has found it. He has found what he's been looking for, or, as his sister has said to him, he has found love. He meets Rebecca, who's about to transfer to another school to study medicine. Nathan and Rebecca have so much in common, so much that they are drawn to each other. They even begin to see each other, and as they begin to date, Nathan finds himself torn between af5dca3d97
