## Solucionarioelectronicadepotenciarashidcapitulo10 ((NEW))

```
This is my code: import pyaudio import wave import time import sys from pathlib import Path r, sample_rate =
48000, 44100 def stream_callback(in_data, frame_count, time_info, status): print('stream_callback')
print("Number of frames recieved:", frame_count) print("frame rate:", sample_rate) print("Total duration:",
time.time()-start_time) if status == 1: data = in_data elif status == 2: data = None elif status == 3: data =
None global waveData, waveData_length, waveData_start_offset waveData += data waveData_length =
len(waveData) global waveData_start_offset waveData_start_offset += waveData_length p = pyaudio.PyAudio()
stream = p.open(format=pyaudio.paInt16, channels=1, rate=sample_rate, input=True,
frames_per_buffer=1024, stream_callback=stream_callback) start_time = time.time() while True: if
stream.is_active(): data = stream.read(1024) if data: waveData += data waveData_length = len(waveData)
print("WaveData_Length:", waveData_length) # Update the offset if waveData_start_offset > 0: with
open("waves/wave.raw", "rb") as fh: waveData = fh.read(1024) waveData_length = len(waveData)
waveData_start_offset = waveData_start
```

My desired course is to be able to enter video clips directly into the EducationPortal program. While doing this, I am also interested to publish the videos on YouTube. I therefore plan to use SHOUTcast to do this. While I do not intend to use the TI Network Portal to access it, I would be interested to know if I could stream the TI network portal through my HTPC and stream to anywhere else in my home via an internet

---

connection. I don't know if I would need to have my own router since I could use a simple repeater to transmit a signal back out to the router. It's time for the long-awaited Samsung IR Remote 2 update and this time you'll get two remotes for the price of one. Even better, you can get both in an all-new way.

For the first time ever, the upgradeable Samsung IR Remote 2 (model number S36B50) gives you the ability to use both ir and remote control features

---

simultaneously, making it the only universal remote in the world that provides the flexibility to send two different control codes to your devices. The new feature was developed in partnership with Google as part of the updated Google Home app and the feature is designed for the updated app. Manufacturer Samsung Dimensions 4.6" x 1.3" x .6" The updated Samsung Remote 2 supports all the major manufacturers including Sony, Samsung, LG and Panasonic,

---

even though it can be used with Smart TV remotes from other companies. The new remote control is another step for the Samsung iQ experience and is a useful addition to the Samsung multi-room experience and home theater. Although the IR Remote 2 is not a universal remote, it allows you to control devices that are compatible with the iQ hub and Smart TV's. So what types of devices can it control? The Samsung Remote 2 will be able to control the following smart

---

devices: Samsung Smart TV/LCD  
TV/Lumia/Xiaomi Samsung Smart
