How to find the number of days in a year The question is about programming in C#. How can I find the number of days in a year? I need a function. A: There is no need for a function for finding the number of days in a year; the DateTime class already contains a property DaysInYear: Gets the number of days in a year. A: Since.Net 1.0, you can take use of the DateTime class to get the number of days in a year. Q: How to get the border color from an HtmlElement using javascript or css I'm trying to learn how to get the border color of an HtmlElement. I have been given the javascript code as is shown below, and it works just fine in Chrome. function changeColor(){ var c = document.getElementById('container'); if (c.style.background == 'blue'){ c.style.background = 'black'; } else

if(c.style.background == 'black'){
c.style.background = 'blue'; } }; However, when I
try to test this in Firefox, it does not change the
color as expected. How can I get the same code to
work in Firefox, so I can get the color of the div to
change from blue to black? A: c.style.border =
"1px solid " + c.style.background; Shouldn't work
in FF. You can try: var c =
document.getElementById('container').style To
see what's set. /* * Copyright (C) 2015 The
