As expected, the movie is presented in 1080p and the source material is the 5.1 DTS-HD Master Audio track, as well as Dolby Digital 5.1. The audio is clean and detailed (though a little more compressed than other higher quality releases) with plenty of dialog in the track and very little to no static. Thankfully, the Dolby and DTS audio tracks are not cut, so the lossless content is intact. The existing two disc editions of Star Wars aside, I have a soft spot for the original Star Wars boxed set, which I used to pore over as a kid. The 4K upgrade on that set, initially limited to the discs themselves, seems like a no-brainer. But that's not the case here: not only is there no attempt to encode the movie in 4K (the existing Blu-rays were encoded in 4K), but there's no uncompressed option, either. There are 16:9 and 2.35:1 options available, but that's it. The PCM sound is also encoded in 16:9, not 2.35:1 or some other aspect ratio. "Does it make the kids think better of the movies? Absolutely," says Peele. "They're the product of a complex narrative, and they're going to engage. They're going to see the movie with an expectation, and they're going to be challenged by the fact that they're being judged by this actor, and how can they be accountable for the things they write. That competition will drive them to work harder and do a better job. And that's what I want them to think about every time they write a story or direct a scene." Milo Ventimiglia and Billy Bob Thornton star as brothers who have been estranged for years. When they both return to their childhood home in Jasper, Florida, the drama between them escalates, and unfulfilled family tensions break out into violence. [4/12/15,12:33:03 PM] davidkey: I love the mutual dorkness in the brothers ending, some great comic timing and its pretty how Thornton and Ventimiglia make that a tension [4/12/15,12:33:44 PM] rinkif: i also love the cop brother lets you go brother ending!
