to get started with finch, open the file you want to convert to a .pdf file. since finch uses the same xml paper specification program that you would use with microsoft word, you can save the.svg file as .doc. you will want to save it in a single file, however, with a name like the one above. you will also want to save the.doc file in a folder that has a few other files. for example, you could start by opening a file called .svg in a folder called /carlappel\_files/svg. you could also open a document .svg and then save it in the same folder with the name.svg.txt. you might have to modify your system's file associations to make it so that you can open.doc files with the finch program. if you open your folder and can see the.doc file, you are ready to convert your.svg file. to establish whether the works contain images or texts that constitute criminal offences and if so what matters of law apply and whether any defence applies. these are to be published on <http://www.justice.gov.uk/aboutus/tacklan/pdf/criminalprocedure/> this is an important moment that requires a serious policy response that demonstrates that this government will not tolerate any attempt to undermine the separation of church and state or undermine the rule of law. it is certainly not a time to retreat behind the pretence that the government has no position on the matter. labour's leader, ed miliband, has said that he wants the tories to publish "everything that harriet harman has asked for" on the issue, including access to the papers so mps can judge for themselves. his deputy leader, tom watson, says: "what we will do is make sure that we take every opportunity to get to the bottom of it." 5ec8ef588b
