## What's New in the?

- USB device I/O - WAV, MP3, MIDI, OGG, FLAC, WMA, and AVI format - VST, RTAS, and AU plugins The 'Mean Green' is a modular, chromatic musical instrument tuner. It allows the user to select and modify the frequency of musical notes by way of a slide tuning needle. The frequencies are selected using the keyboard and the computer mouse. The software is supplied with a myriad of presets that cover all the basic and some sophisticated tunings. Many of the presets are based on tunings used by some of the world's most famous musicians and guitar players. The presets are also based on the notes selected by the user to ensure a consistent preset note value. The 'Mean Green' supports various instrument tunings that include the standard tunings: - Open (standard) - Half closed - Full closed - Split half - Split full - Custom - Harmonically just and also a variety of other tunings including: - Myron Markey Half Open - Myron Markey Full Open - Myron Markey Perfect Open - Myron Markey Open - Myron Markey Whole Open - Myron Markey Half Perfect - Myron Markey Full Perfect - Myron Markey Perfect - Myron Markey Partial - Myron Markey Partial Complementary - Myron Markey All 12ths - Myron Markey All 12ths Complementary - Myron Markey 6ths - Myron Markey 6ths Complementary - Myron Markey 3rds - Myron Markey 3rds Complementary - Myron Markey 8ths -Myron Markey 8ths Complementary - Myron Markey Quarter Tones - Myron Markey Quarter Tones Complementary and much more... \*\*NOTE: The use of these presets is only an example of what the software can do. The presets that are supplied are not necessarily what I, or other musicians, use. So it is highly recommended that you go through the entire software to find a preset that you use. The built-in preset system is very comprehensive. It does this by providing you with the ability to change the letter values of the scale and the note values of the scale. These presets can be saved as their own user default presets to the tuner. These presets can then be used and reused without altering the original files. So how do you save and reuse your own user-defined settings? The easy way is to use the batch-save facility. If you use this facility, you can save a collection of presets as a '.mus' file. This file can then be loaded into the

## **System Requirements:**

\* Windows 10, 8, 7, Vista, XP, 2003 \* Mac OS 10.10, 10.9, 10.8, 10.7, 10.6 \* iOS 6.0, 5.0, 4.3, 4.2 \* Android 2.3.3 or higher Windows PC users please download and install the latest official version of TuniTunĪ for your system by clicking here. Please note that Microsoft has announced that they will no longer support Windows XP. Please update to a newer
