Spyder 07-13-2008, 03:07 PM If you are not interested in creating a project and just want to import the samples and play them back, there are many other ways to do this. For example, Audacity can be used for this and it is probably the easiest to use for beginners. fastwav will do the trick as well. BrentWhite 07-13-2008, 04:13 PM For those of us who don't have the option of installing the FL X2, is there a way to use FL X for importing to FastWAV? Thanks for posting this. blammo 07-13-2008, 05:14 PM For those of us who don't have the option of installing the FL X2, is there a way to use FL X for importing to FastWAV? Thanks for posting this. There is a piece of hardware called an Audio Hijack Host for using the track and cue function of FLX. fastwav will do the trick as well. Can it play a file in realtime when you use Audio Hijack Host? These ones are great for loading 1 1/2gb cd's in less than 5 minutes: QGIS Style Sheets / use Style object in script I have a layer and I want to define styles based on this layer's attribute. In attribute table of the layer I have 3 attributes that I want to use for styling (type, color and size). Now I tried to save this layer as a new Style object. Now I want to use it in a script. But I can't figure out how to do it. My script is: import processing
