Fundy Designer Album Builder Crack Fundy Designer Album Builder V1.9.34 Para Mac Fundy.Q: Customizing multiple thumbnails at a time in rmagick I have searched for this but haven't been able to find what I'm looking for. I have about 15 thumbnails that I would like to automatically adjust the crop, rotation and scale when the user clicks the div (the thumbnails have classes named "thumb_image_1, thumbnail_image_2, etc."). This is my first project with RMagick, and here is a cut down version of the code I have:

```
class RMagick::Image module ClassMethods def thumb_image_1 self.crop("-420 +210 -95") self.resize("/public/images/thumb_images/1_thumb.jpg", "80x80", "#") self.flatten end end end
```

 I'm not sure how to write a for loop that does the things described. Any help with this would be greatly appreciated. A: In your view where you generate all the thumbnails you want, rather than using a class method on Image, I'd just use a method that doesn't require a loop. Then when you generate a single thumbnail, you could either use an image method (such as `get_frame`) or simply access a named image `80, :height => 80, :crop => "-420 +210 -95",`
