Adobe has built an entire new workspace for mobile, called Adobe Muse, and has also introduced the Adobe Blocks UI. This lets website designers create web pages and content via the software's interface. We've seen the Adobe Blocks UI in action in apps like the new Adobe Website Builder. The blocks in Adobe Muse are similar to the web blocks you see in the website or app builder. The goal of Adobe Muse is to mimic many elements of the iOS and Android design interfaces. The blocks are used to create interface elements like buttons, links, pictures, and more. You can then move the blocks where you want on the page. The blocks are also imported into mobile apps. There are also new features that make it possible to create apps. The latest version of Photoshop, Photoshop CC 2020, offers a number of new features, including new controls and a cropped canvas. You can also take advantage of a new feature called Cropping a canvas to create more attractive, professional-looking work. The update also includes a new 20-Stops-per-Color-Layer feature that's ideal for photographers who want to get the most realistic look in their photos. While developing Photoshop, the company understood the need for features that help users improve their workflow. The company is continuously working on developing it and testing it with time. It is the engineer's dream to deliver the most advanced features not only for the beginners but even for experts. The features like 'Create Vector' and 'Create Vector Mask' are already under testing and they will be launched in a few months' time.
